### **American Wood Council**

**Speaker:** Matthew Hunter, CBO, BCO

**Course:** Prescriptive Residential Wood Deck Guide, with 2018 IRC Updates (Design for Code Acceptance 6 (DCA6)-15)

#### **Course Description:**

*Hundreds of wood decks get built every year and some without the proper guidance for designing or constructing a safe deck. However, AWC DCA6-15, which is in the process of being updated, includes guidance on provisions for the 2015 & 2018 International Residential Code (IRC) pertaining to single level residential wood deck construction. Provisions contained in this document that are not included in the IRC are considered good practice.*

**Course:** Construction Fire Safety Best Practices

#### **Course Description:**

*This program provides information to assist the Fire Official charged with responsibilities for fire and life safety on a construction site to follow best practices. Builders and building officials will also benefit from the information provided. The purpose is to reduce the risk of construction site injuries and losses from fire. The information applies to the design and planning stages as well as the actual construction phase of buildings. Many hazards can be addressed before they become an issue by adoption of best practices and rigorous code enforcement. The primary focus of this program is on large buildings during construction. Other topics that include demolition, alterations, renovations, repair and maintenance, as well as newly-completed buildings will be discussed. This program provides guidance that is based on compliance with Chapter 33 of the 2018 International Fire Code, Chapter 33 of the 2018 International Building Code, and NFPA Standards 1 and 241.*

### **Hilti**
